

EXCHANGE-TRADED FUND FACT SHEET

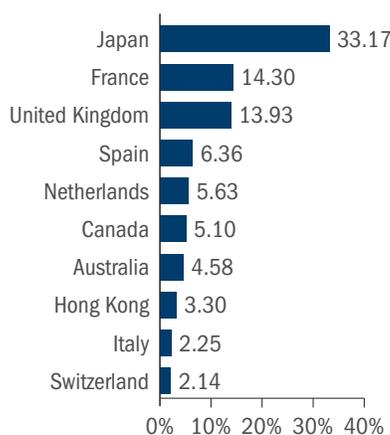

ESGN | COLUMBIA SUSTAINABLE INTERNATIONAL EQUITY INCOME ETF

Reasons to Invest

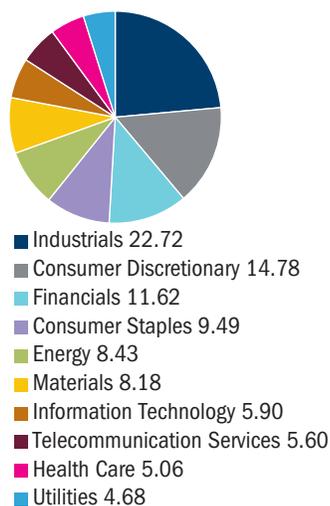

- **Access to international dividend paying companies:** Serves as a core International holding that provides access to dividend paying companies. Dividends have significantly contributed to market returns over time - since 1930, the S&P 500 has returned 9.5% annualized, with 43% return coming from dividends.¹
- **Generating income:** Multi-factor approach aims to provide consistent income by identifying dividend paying companies with the financial stability and consistent cash flow to support their payouts.
- **Mitigating ESG risks:** Incorporating environmental, social and governance (ESG) screening allows access to companies that are better stewards of capital by identifying potential long-term risk factors, assessing management quality and limiting possible pitfalls and event risk.

Sector Breakdown

Performance History (%)

	3-Month (cum.)	Since Inception ²
Total Returns (Net Asset Value)	2.35	7.24
Total Returns (Market Price)	1.71	9.79
Beta Advantage Sustainable Intl Equity Income 100 Index	2.62	7.66

Performance data quoted represents past performance. Past performance does not guarantee future results. Investment return and principal value of an investment will fluctuate so that an investor's shares, when sold or redeemed, may be worth more or less than the original cost. Current performance data may be higher or lower than actual data quoted. For the most current month-end performance data please call 888.800.4347.

Market price returns are based on the midpoint of the bid/ask spread at 4 pm Eastern time and do not represent the returns an investor would receive if shares were traded at other times. Returns over one year are annualized. *ETF shares are bought and sold at market price (not NAV) and are not individually redeemed from the fund.*

Investment risks — **Investing** involves risks, including the risk of loss of principal. **Market** risk may affect a single issuer, sector of the economy, industry or the market as a whole. **ETFs** trade like stocks, are subject to investment risk and will fluctuate in market value. **International** investing involves certain risks and volatility due to potential political, economic or currency instabilities and different financial and accounting standards. Investments in **mid-cap** companies involve risks and volatility greater than investments in larger, more established companies. **ESG** factors may cause the fund to forgo certain investment opportunities and/or exposures to certain industries, sectors or regions. Additional information regarding the risks of this investment is available in the prospectus.

Dividend Yield is a financial ratio that shows how much a company pays out in dividends each year relative to its share price. **Market Capitalization** is the total dollar value of all outstanding shares, calculated by multiplying shares times current market price. **Price/Book Ratio** is a stock's price divided by its book value, and may help determine if it is valued fairly. **P/E Ratio (Trailing)** is a stock's price divided by after-tax earnings over a trailing 12-month period, which serves as an indicator of value based on earnings. **Total Constituent Daily Traded Value** is the sum of the six-month average daily traded value (in USD) of a fund's individual holdings.

The Funds are distributed by ALPS Distributors, Inc., which is not affiliated with CMIA. Columbia Threadneedle Investments is the global brand name of the Columbia and Threadneedle group of companies.
