Emerging market investments involve risk of capital loss from unfavorable fluctuation in currency values, from differences in generally accepted accounting principles, from economic or political instability in other nations or increased volatility, and lower trading volume.

Holdings and weightings are as of the date indicated, are subject to change and should not be considered a recommendation to buy individual securities.

ETF shares are bought and sold at market price (not NAV) and are not individually redeemable. Investors buy and sell shares on a secondary market. Shares may trade at a premium or discount to the NAV. Only market makers or "authorized participants" may trade directly with the Fund(s), typically in blocks of 50,000 shares.
